Claims 1 to 34 are pending.

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.
2. This application is in condition for allowance except for the following formal matters:

Claims 1 to 34 are objected to because of the following informalities: both claim 1 and 19 end with language setting forth that the upper magnetic pole layer is connected to the back gap layer through top surfaces of the gap layer and the gap-depth defining layer. This is considered mis-descriptive as the upper magnetic pole layer does not pass through the gap layer and the gap-depth defining layer as suggested by the use of the term "through". Another interpretation would be that the language is intended to establish that the gap layer and the gap-depth defining layers are the layers that are interposed between the upper magnetic pole layer and the back gap layer. This interpretation does not work with claims 1 or 19 as the gap layer is defined as having a rear surface that contacts a front surface of the gap-depth defining layer and as a result the gap layer would not extend far enough back towards the back gap region to be present between the upper magnetic pole and the back gap layer.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

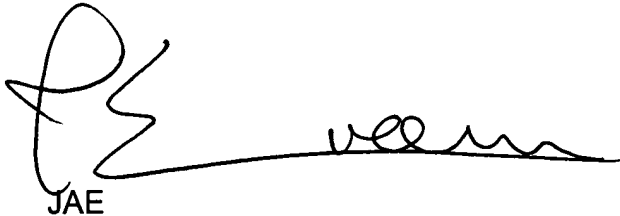

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
